Dear Jean, 8/21/47

Your long registered letter of 8/17 arrived this morning. I am expecting to leave for NY and will read it carefully and reply later today or will read it on the train and reply on my return.

I have finished a two-hour discussion on the CHE series. I will have it typed out and you'll enjoy. I will also mail some of the others who agree with me for comment.

I think the agent is the lab will give me a fight, and on principal only, they also document an important aspect of the total study. If the FBI decides on a hearing will it be open? Anyway, I'll have the facts in court. I am not hurrying on this, except to get results.

Wish I knew the lab case. They report through the sender just my copyrighted work in Frame 190 is new and original. Will clear through Alvarez. I think this is not plagiarism, since improper use of material they have was also part of their interpretation to employer. My 25 last boy with a PhD I have a thing among common failings of modesty and misrepresentation against them. I have learned to sing now on the other threads, more the material from and to FBI. I think that with a good lawyer, this could make my property much more valuable and important.

Sincerely,
